CASE STUDY

THE CHALLENGE

To provide customized robust flightcases (for telecom gear) at affordable price.

THE SOLUTION

This case is a perfect example of our flexibility and versatility. Flight cases are not listed on our website as part of our product portfolio. Upon request of the customer we were able to source a local business to produce the flight cases to the exact specifications requested by the customer. With our vast network we can tailor to any request!

We saved on transportation cost for this project by shipping flightcases as unassembled packages. Flightcases were put together in the workshop locally which worked out perfectly.
